

The MINI-MAC mini rack oven is a small oven with the efficiency and functions of a large rack oven which makes it perfect as an in-store oven. All mini rack ovens can be equipped with a proofer cabinet.

The MINI-MAC is available with gas or electrical heating and either with touchscreen panel with all benefits that come with it such as pre-stored baking recipes gathered in alphabetical order, or as electro mechanical controlled.

Cost saving double glass with strong high quality insulation which ensures that heat loss is minimal. Easy to clean stainless steel in and outer covers. This oven offers a great variation in products that can be baked. As an option a compact underbuilt proofer cabinet with humidity and heat sensor can be added which makes a stand-alone proofer unnecessary.

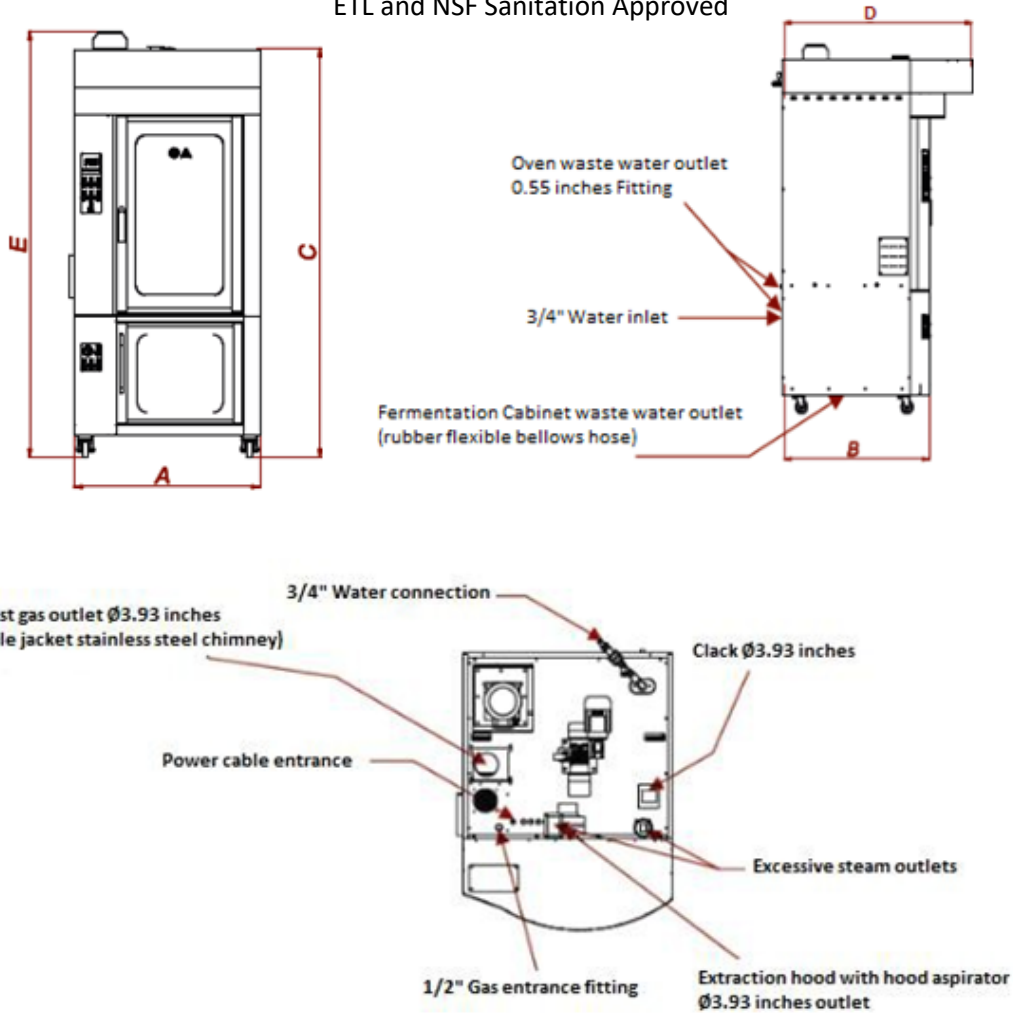

The MINI-MAC offers a good overview thanks to its large front glass and excellent lighting. The MINI-MAC has a built-in high capacity steam system and comes as a 7 or 10 rack oven with ideal dimensions to be used as an in-store baking unit.
